

Jungle Escape

The Experience

The adventure begins when the aircraft the group is travelling on crash-lands in a remote jungle. To survive, they must build a helicopter to escape, using spare parts, a diagram, and limited access to a completed model.

Overview

The Jungle Escape challenges participants to work together to complete the project to a deadline with limited information.

This reveals how they function as a team and in which team development category they fall.

Key learning Points

Discover how teams function:
Fragmented, Divergent or
Cohesive

Learn the group-processing skills
vital to effective team work.

Experience first-hand the impact
of planning on group results

Understand the effect of
individual behaviour on group
productivity

Practicle Details

2-3 hours per session

Suitable to introduce or reinforce
basic team-building skills.

Ideal for both team-building
workshops and conferences

Results

In addition to being fun and a
highly effective hands-on
intervention it reinforces:

Proper Planning

Basic Team Skills

Communication

Decision making

Problem solving

Conflict Resolution

Time management

Holistic Advancement
